Cal EOC Incident – 2014 Drought

Drought Proclamations

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Isolated thunderstorms will develop over the interior mountains this afternoon. Coastal locations can expect morning low clouds followed by partial clearing each afternoon. Low pressure will develop off the north central California coast through the weekend with increasing chances for thunderstorms on Sunday and Monday.

San Francisco Weather:

An approaching mid/upper level low pressure system is forecast to stall off the California coast this weekend and result seasonable weather conditions and near normal temperatures. A slight warming trend is then forecast for the latter half of next week.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Thunderstorms are possible over the mountains the next several afternoons, with potentially more widespread thunderstorms Sunday into Monday. Temperatures to remain near normal through next week.

Hanford Weather:

Temperatures will remain a little above normal today then lower slightly into early next week. A few afternoon and early evening showers and thunderstorms are possible over the southern Sierra today through Monday.

WEATHER

WEATHER SYNOPSIS BY REGION: (Cont.)

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Southwest flow aloft will keep onshore flow in place through much of next weekend with continued night through morning low clouds and fog at the beaches and some inland areas. Temperatures near seasonal normals will be prevalent as a broad upper level trough lingers over the region.

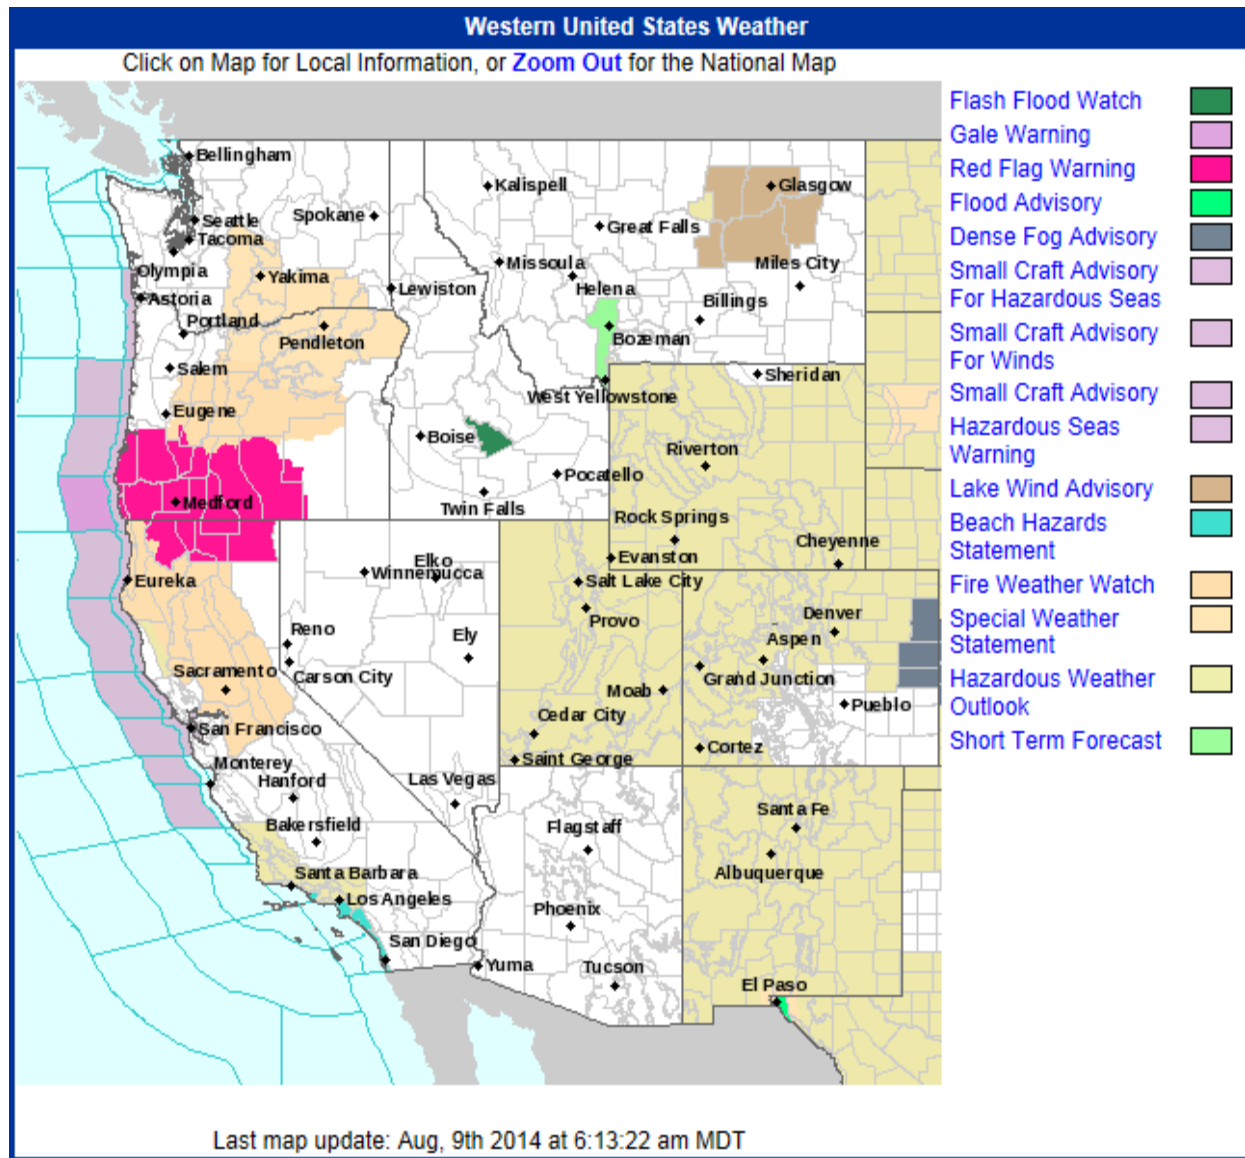

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Dry southwest flow aloft will continue through the weekend. Monsoonal moisture will bring a slight chance of afternoon and early evening thunderstorms for the mountains and deserts Monday and Tuesday. Drier southwest flow aloft will return for the rest of next week. Temperatures will remain near seasonal levels. Weak onshore flow and the marine layer will bring areas of night and morning low clouds and patchy fog extending from the coast to the lower inland valleys.

Southeast California Weather:

A gradual increase in storm chances is expected this weekend as atmospheric conditions slowly become more favorable. However, widespread storm activity is not expected on the lower deserts. The trend in storm chances remains relatively flat for next week.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 7th : Don Pedro 43%; Exchequer 19%; Folsom Lake 41%; Lake Oroville 34%; Millerton Lake 51%; New Melones 25%; Pine Flat 12%; San Luis 21%; Lake Shasta 33%; Trinity Lake 34%; Pyramid Lake 93%; and Castaic Lake 47%.
- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)
Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water¹ to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.
http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml
- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
